

## Semi Sales Up +20.5% in June Sales Have Exceeded +20% Growth for 15 Consecutive Months

The Semiconductor Industry Association (SIA) reported record June sales of \$39.3 billion, up +20.5% from prior year and up +1.5% sequentially. Regionally for June, the SIA reported that China grew +30.7% YOY, Japan grew +14.0%, Asia Pacific/Other grew +8.6%, the Americas grew +26.7% and Europe grew +15.9%.

The connector industry sales, measured in U.S. dollars, increased +14.9% to prior year and contracted -4.4% sequentially. Regionally for June, YOY sales increased +13.4% in North America, +20.1% in Europe, +14.4% in China, +5.9% in Japan, +14.8% in Asia Pacific and +15.5% in ROW.

The following graph compares semiconductor sales performance to the connector industry.

Monthly Sales Performance  
Year-Over-Year

- Semis grew for the 23<sup>rd</sup> consecutive month and have outpaced Connectors for the last 19 months. Semis have grown in the lower 20% range for the last 15 months.
- Semi sales continue strong YOY growth despite difficult comparison to prior year. Connector growth is slowing down due to difficult comparisons to prior year.
- The continuing strong growth of sales of semis and connectors demonstrates strength in the worldwide economies.

The following table displays year-to-date performance, measured in U.S. dollars, by geographic region for both components.

Both components sales growth performance is tracking more closely in total world sales. On a regional basis, however, performance is diverging in North America, Japan and China.

High demand for semiconductors always leads to strong connector sales. Both components had record sales in 2017 and have a very strong start in the first half 2018.

Connectors are projected to grow +10.8% in 2018 to \$66.6 billion. The SIA projects semiconductors to grow +12.4% in 2018 to \$463 billion. We believe this forecast will be revised upward.
