World Telecom Connector Market 2020 - 2025

Report No: M-510-21
January 2021

The World Telecom Connector Market 2020 - 2025 is Bishop & Associates newest research report. This nine chapter, 254-page, research report provides a detailed analysis of the connectors used in the six key telecom sub-sectors; enterprise equipment, wireless infrastructure, wireless subscriber, carrier network, cable/MSO network, and other telecom equipment. Connector statistics are provided by year, region, sub-sector, connector type and more than 60 different equipment types.

The drivers for connector sales into the telecom market are largely based on consumer behavior – consumers of Internet connectivity, data centers, and wireless applications. Today, everyone wants to be connected all the time, whether it is for work or leisure. As a result, this connection has increasingly becoming a wireless one.

Trends like this show how consumers will drive the need for updated mobile networks. In particular, upgraded mobile connection technology – 4G LTE, 5G and beyond, as well as enhanced Smartphones.

Questions addressed include:

- ❖ What factors will contribute to the IP centric trend?
- ❖ What factors are driving growth in the market?
- ❖ How is 5G changing the equipment landscape?
- ❖ Which region will show the greatest increase over the forecast period? Will any of the regions show a decline?
- ❖ Within the five primary telecom equipment categories, where is the greatest potential for growth. Which primary equipment category has the greatest potential to decline over the forecast period?
- ❖ Which connector types will benefit most significantly from an increase in telecom equipment sales? Will any connector types see a decrease in demand?
