

# The I/O Rectangular Connector Market 2021

Research Report P-520-21  
October 2021

Bishop & Associates has just released a new three-chapter research report providing a detailed analysis of the I/O rectangular connector market. This new report furnishes detailed statistics by region and by I/O rectangular connector type for the years 2019, 2020, 2021F, and 2026F.

### Total World I/O Rectangular Connector Sales by Region 2020-2021F with Percent Change

The world I/O rectangular connector market is complex and diverse. While products developed several years ago (D-sub, ribbon connectors) are experiencing steady or rapid decline several more recently developed products are growing extremely fast. The third largest product family, connector types falling under the I/O rectangular connector banner include D-subminiatures, SFP (small form-factor pluggable) connectors, blade and tab contact connectors, rectangular power connectors including RAST type, and rack and panel connectors. I/O rectangular product types also includes one of the fastest growing connectors presently offered on the market, a product type now used in every single market sector, the USB connector.
